## SKILLS

Node JS

React JS

Next JS

Golang

Angular JS

Python

Django

Html/CSS

C++

Docker

Kubernetes

Jenkins

GRPC

GraphQL

SQL

Three.js

GSAP

JAVA

## ACHIEVEMENTS

- Got 600+ players in obscure in 2 days.

## EXPERIENCE

Google Code-In Mentor, 2018

Helped Google Code-In Participants in various projects in Javascript, Node JS, MongoDB, CSS, etc.

goFlatmates.com internship (Jan 20-Jul 20)

goFlatmates is a flatmate matching platform connecting quality professionals. Where I worked on NEXT JS to write beautiful frontend with better SEO and Node JS microservices to provide fast and reliable backend. Used MongoDB for database, Jenkins to provide CI/CD, Docker to build containers and more such tools.

Gawds.in

College club consisting of similarly minded people with common motive of making development more popular among college folks, learning new stuff by helping each other out and organizing workshops in college related to various technologies like web development, ML, etc.

## PROJECTS

Obscura

[github.com/war-turtle/Obscura\\_6.5\\_backend](https://github.com/war-turtle/Obscura_6.5_backend)

[github.com/war-turtle/Obscura\\_6.5\\_frontend](https://github.com/war-turtle/Obscura_6.5_frontend)

Online crypto hunt event made using React JS, Golang and gRPC (gRPC Remote Procedure Calls) microservices to serve the requests over HTTP2 using Protobuf binary protocol and deployed using docker swarm to provide zero down-time with Envoy reverse proxy.

CoContainers

[github.com/war-turtle/CoContainer](https://github.com/war-turtle/CoContainer)

Implementation of linux namespaces in golang to learn how various containerizing systems (like docker) works.

Chatoly

[github.com/war-turtle/chatoly](https://github.com/war-turtle/chatoly)

A realtime chat app build using node JS, ejs and socket IO. Made to bring people with common interests together.
